

MAXWELL KARANJA

SOFTWARE ENGINEER
AND WEB DEVELOPER

Cover Letter

Dear Sir/Madam,

I am pleased to write this letter to express my high interest to the job position in your posting by your organization. I am confident that my experience in the IT field as a software and web developer will be an asset to your company.

I am a focused IT specialist offering multiple technical skills. From simple and brilliant ideas to well-structured web interfaces to lines of code, database administration, backend administration to creating interactive web applications and deploying them in live servers. As a young, new generation software engineer and a web developer with 2 years experience I enjoy interacting with computers, networks, operating systems, software, development techniques and solving challenges that come with the subjects for smooth daily business activities.

I am an adamant believer that technology leads and society follows and the move towards increasing inclusivity and diversity in the IT industry through representation is of importance to me. Learning, adapting and refining my skills has always been my personal ambition and priority for new projects, working tools and work environments.

I am a flexible IT oriented individual, very willing and ready to learn, adapt and refine my skills with the right company and I would really appreciate if you pick me for the position.

I look forward to speaking with you to discuss how my experience and abilities can match your needs I have attached my Resume in relation to the same.

Thank you.
